

## **Technical Data:**

Issued: Nov.2011 Revision 2: July 2018, Page: 1

# EP 140FR/ Hardeners EPC 124/ EPC 520/ EPC 304IP55

#### **Product Description**

EP 140FR is a highly filled potting and encapsulating epoxy compound, UL 94-V-0 approved, exhibiting high thermal conductivity, low thermal expansion and excellent electrical insulating properties. EP 140FR can be used with a variety of curing agents.

#### **Features & Benefits**

- High thermal conductivity
- UL 94-V-0 approved
- Excellent electrical properties
- Low viscosity
- High temperature resistance
- Flexible pot life

### **Applications**

Encapsulation of electrical and electronic devices and components, where high heat dissipation and low thermal expansion are needed

# Typical Uncured Properties

Note:

The following technical information and data should be considered representative or typical only and should not be used for specification purposes.

Resin EP 140FR			
Appearance/Color	Black		
Viscosity@25°C, mPa*s	40000-60000		
<b>Density</b> @ 25°C, g/cm <sup>3</sup>	2.2-2.3		
Equivalent Weight (calc.), g/eq	700-800		

#### **Instructions for use:**

Warm EP 140FR to 40-50°C and stir contents thoroughly before withdrawing material.

Weigh required amount of resin and hardener into a clean container in the recommended ratio. Blend thoroughly being careful to scrape sides and bottom of the container for 3-4 minutes to ensure uniform mixture.

To produce a void-free casting the mixture should be deairing at 2-5 mmHg for 5-8 minutes to remove trapped air.

http://www.polymer-g.com

Pour the mixture into mold.

Preheating the mold reduces viscosity of the mixture and improves its flow. Further deairing in the mold may be required.

Processing	Resin EP 140FR	Hardeners		
		EPC 124	EPC 520*	EPC 304IP 55
	Mix Ratio, w/w	100:6.8-7.2	100:6.8-7.2	100:7.5-8.0
	Mix Viscosity@ 25°C, mPa*s	4000-7000	4000-7000	4000-7000
	<b>Gel Time</b> @ 25°C, (100g), min	50-70	120-150	150-180
	<b>Typical Curing Schedule</b>	24hr/RT	24hr/RT + 4hr/80°C	24hr/RT
Cured Properties**	<b>HDT</b> , °C	60	108	76
	Hardness, Shore D	90	90	90
	Tensile Strength, MPa	39	40	38
	<b>Tensile Elongation</b> , %	0.5-0.7	0.5-0.7	0.7-1.0
	Thermal Conductivity, W/m-K	0.7 - 0.8		
	Linear Shrinkage, %	0.2		
	Service Temperature, °C	-40÷ 130	-60÷ 160	-40÷ 130

<sup>\*)</sup> Post curing at 80-100°C is must.

#### **Storage**

The shelf life of the EP 140FR is 12 months at 20-35°C.

For the best results, store in tightly closed original containers.

Certain resins and hardeners are susceptible to crystallization. If crystallization occurs, warm the container to 50-60°C until the crystals have dissolved.

Stir and allow content to cool to room temperature before use.

#### **Packaging**

Packaging sizes are available from 1L up to 18L pails.

#### **Limitation of Liability**

Except where prohibited by law, Polymer-G and seller will not be liable for any loss or damage arising from the Polymer-G product, whether direct, indirect, special, incidental or consequential, regardless of the legal theory asserted, including warranty, contract, negligence or strict liability.

<sup>\*\*)</sup> The samples were tested after post-curing 3hr at 120°C
